

Statement from Charlie Aleshire - DebonAir Mechanical, Inc.

I want you to know that DebonAir has aggressively responded to the COVID – 19 pandemic with one thing in mind, and that is the safety and security of our customers and employees.

As you may know, DebonAir provides critical support to several essential industries such as healthcare (hospitals and assisted living facilities), pharmaceutical, power generation, and military installations, just to name a few. These customers, thousands of them, count on us to follow all CDC, Federal, State, and local COVID-19 guidelines. You can be assured that all of our highly trained field technicians understand and are adhering to those guidelines.

Our customers also count on us to keep their air conditioning equipment operating at peak performance around the clock. In spite of the COVID – 19 pandemic, we remain fully operational and continue to provide 24/7 emergency service through our on-call emergency hotline 800- 447-1562; that number again is 800-447-1562. Our response time to emergency calls is less than 15 minutes.

DebonAir's Mission has been, and will always be, to set the industry standard as a premier, customer-centered, service oriented company. Our values of integrity, honesty, and service above self will never change.

Please know that we are here to help you with whatever you need, 24/7.

Respectfully,

Charlie Aleshire
